SUMMARY

Senior Product Designer with 11 years in UX and a front-end development background. Recent work focuses on government and enterprise platforms in Saudi Arabia: service flows, data-heavy dashboards and token-based design systems, in Arabic (RTL) and English. Works closely with developers so designs hold up once they are built. Uses AI heavily to speed up research, user flows, wireframes and prototyping.

SELECTED WORK

Federation of Saudi Chambers platform & dashboard · Balady gamified app & design system · Dhamer Hajj & Umrah app · Ajdar fintech dashboard
